- PostgreSQL - MySQL - SQLite
- Sublime Text - PHPStorm
- jQuery – VueJS – Zend Framework
- Apache - Nginx - IIS
- Microsoft Office Suite

experience.

Frontend Web Developer
Nammu21, Remote

October 2017 – January 2018

- Lead the front-end portion of an ambitious financial technology start-up product, deciding on all framework usage and coding the vast majority of the initial systems.
- Collaborated with the lead designer to establish the look and feel for the entire product moving forward.
- Co-ordinated a small team of front-end developers, including delegation of tasks in an agile-like process.

Web Developer
Launchfire Interactive, Ottawa, Ontario, Canada

November 2015 – October 2017

- Transformed many designs into fully functional promotional websites viewed by millions with a high emphasis on sleek and modern animations.
- Was integral to the early lifecycle stage of the company's latest major products, primarily leading the Front End framework decisions, enforcing a style guide and writing initial Behat tests.
- Was an integral part of a team building a training tool for a large banking company, to be used by both internal employees and customers.

Webmaster
Vinci Education, Ottawa, Ontario, Canada

January 2015 – November 2015

- Sole developer for all website modifications and additions, including large SPA (single page app) pages and extensive backend coding in ASP.NET and Java with Apache OfBiz.
- Responsible for managing all internal and cloud servers, hosting a myriad of services such as SVN, Unity Asset Servers, Learning Management Systems, Resource Spaces, LDAP and multiple public websites.
- Personally handled the migration of several large, locally hosted, Linux servers to Amazon EC2 instances, as well as all configuration and further management over time.
- In charge of all employee desktop machines and network hardware. Duties included troubleshooting issues, setting up new workstations and monitoring the rack-mounted switch-boxes and router.
